### MY PROFILE

*Senior AI, Data & Platform Architect with 16 years in consulting experience in Life Sciences. I design **Snowflake**, **Databricks** and Azure-based **GenAI solutions**, building scalable **medallion architectures**, reusable accelerators and **AI-enabled data products** used across 60+ countries and 2,000+ users; With a strong experience **bridging business requirements and technical design** and hands-on work on **data harmonization**, lineage and quality, I **lead technical teams** and **mentor architects** to accelerate delivery and improve data quality.*

### LATEST KEY ACHIEVEMENTS

- ◆ Built Snowflake and Databricks accelerators & medallion commercial data model **reused in 15+ projects**, cutting ingestion/transformation time by ~25.
- ◆ Architected enterprise commercial data hub for **60 countries and 2,000+ users**, integrating Veeva/SAP/market sales and Snowflake Share.
- ◆ Delivered GenAI medical chatbot (Azure Foundry) for **200+ HCPs in 3 countries**.
- ◆ LLM-assisted code generation framework, templates and hosting platform to **accelerate teams by 60%**.

### LANGUAGES

**French**, native speaker (C2) **English**, business fluent (C1) **German**, beginner (A2)

### PROFESSIONAL EXPERIENCE

**IQVIA – Senior Consultant, Engagement Manager** – Basel, Switzerland

- ◆ End-to-end technical solution design of a **GenAI medical chatbot** offering for Healthcare Professionals using Azure OpenAI (gpt-5.1) for 3 countries and **>200 users** in pilot. **Azure cloud-native architecture**: Azure Foundry, ACA, RAG (Cognitive Search), Application Gateway, dedicated vnets.
- ◆ Design and implementation of an accelerators Marketplace leveraging **agentic LLM-assisted code generation templates**, LLM gateways, Docker hosting and GitLab CI/CD – defining **best practices** and helping teams to **deliver and host 80% faster**.
- ◆ Implementation of an end-to-end **multi-purpose data management & engineering tool** in Python, handling **data profiling**, **automated schema generation** and integrity checks, multi-stack ingestion **pipelines generation**, metadata, lineage, **GenAI exploration**, automated **data mapping and transformations**, accelerating project deliveries ~60%.
- ◆ End-to-end technical solution design of Salesforce Effectiveness fully integrated reporting, selfservice and ad-hoc analysis for **60 countries**, multiple sales lines, >2000 data consumers, creating a **unique Commercial data hub** and a **trusted data foundation** for the customer, also used by their own teams. Leading technical architect of up to **15 developers** and successfully **mentored 2 junior architects**.  
**AWS Snowflake medallion architecture**, Power BI from data domains like **CRM** (Veeva) Calls, Events, CLM, ToT, Customer Universe, Samples ; **Google Analytics**, **Piwik** ; **SFMC** campaigns ; ex-factory sales (**SAP**) ; **sub-national market sales** (IQVIA & 3rd party) ; Rep targets.
- ◆ Designed and delivered accelerators **Snowflake and Databricks frameworks** with a curated **standardized Commercial data model**, including **ARD generation** and **standard business rules** (cross-country data harmonization, territory assignment, market definition) reused in **more than 15 other customer projects** since.

**IQVIA – Analyst, Consultant** – Basel, Switzerland

Design & implementation of Salesforce Effectiveness dashboards for multiple customers with cross-country harmonization (Veeva CRM, market sales) in **Power BI** and **Tableau** with data ingestion and transformation in **SQL Server**. Creating a **standardized and reusable medallion data model**, ETL and **master data** development for sales data harmonization system, using Microsoft SSIS and Microsoft MDS.

**SopraSteria – Intern, Analyst** – Strasbourg, France

Delivery of multiple projects for Banks, Schools, Avionics & general industries in various stacks like Java EE, .NET, Qt/C++, Windows CE.

### CERTIFICATIONS & DIPLOMA

|                                                            |                              |
|------------------------------------------------------------|------------------------------|
| <b>Snowflake SnowPro Core</b>                              | JUNE 2026                    |
| <b>Databricks Data Engineer Associate</b>                  | OCT 2025                     |
| <b>Masters in Computer Science for Business management</b> | OBTAINED WITH HONORS IN 2010 |
| MIAGE – Université de Haute Alsace, Mulhouse – France      |                              |
