MY PROFILE

With 16 years in consulting and leadership of enterprise commercial data platforms in Life Sciences, I design **Snowflake**, **Databricks** and **Azure-based GenAI enterprise data platforms**, combining hands-on architecture, delivery rigor, and strong client-facing leadership to build trusted and scalable **medallion architecture data foundations**, reusable accelerators, and **AI-enabled data products** used across 60+ countries and 2,000+ users; With strong experience **bridging business requirements and technical design** and hands-on expertise in data harmonization, lineage and quality, I am recognized for high client satisfaction, end-to-end ownership, and **mentoring architects and technical teams** to raise engineering standards, accelerate delivery and improve data trust at scale.

LATEST KEY ACHIEVEMENTS

- ◆ Built Snowflake and Databricks accelerators & medallion commercial data model **reused in 15+ projects**, cutting ingestion/transformation time by 30%.
- ◆ Architected enterprise commercial data hub for **60 countries and 2,000+ users**, integrating Veeva/SAP/market sales and Snowflake Share across **>350 data sources**.
- ◆ Delivered GenAI medical chatbot (Azure Foundry) for **200+ HCPs in 3 countries**.
- ◆ LLM-assisted code generation framework, templates and hosting platform to **accelerate teams by 60%**.
- ◆ **Trusted technical lead**, driving architecture, delivery improvement, and mentoring.

TECHNICAL SKILLS & OTHER COMPETENCIES

CORE STACK	Databricks technologies, Snowflake technologies	●●●●
	SQL with best practices & standard patterns (SCD, CDC)	●●●●
	Azure cloud-native architectures (ACA, vnets, Application Gateway)	●●●○
	Python, bash	●●●○
TOOLS	Linux server, Docker, vnets, hosting	●●●●
	Power BI, Tableau, SSAS	●●●○
	Azure OpenAI, Azure Foundry, Cognitive Search	●●●○
	ETL/ELT (SSIS, Spark, dbt, Informatica)	●●●●
	DevOps toolkit & GitLab CI/CD	●●●●

LANGUAGES

French, native speaker (C2) **English**, business fluent (C1) **German**, beginner (A2)

PROFESSIONAL EXPERIENCE

- 2019 - TODAY
- 

IQVIA – Senior Consultant, Engagement Manager – Basel, Switzerland
 - ◆ End-to-end technical solution design of a **GenAI medical chatbot** offering for Healthcare Professionals using Azure OpenAI (gpt-5.1) for 3 countries and **>200 users** in pilot. **Azure cloud-native architecture**: Azure Foundry, ACA, RAG (Cognitive Search), Application Gateway, dedicated vnets.
 - ◆ Design and implementation of an accelerators Marketplace leveraging **agentic LLM-assisted** code generation templates, LLM gateways, Docker hosting and GitLab CI/CD – defining **best practices** and helping teams to deliver and host 80% faster.
 - ◆ Implementation of an end-to-end multi-purpose **data management & engineering tool** in Python, handling **data profiling**, **automated schema generation** and integrity checks, multi-stack ingestion **pipelines generation**, metadata, lineage, **GenAI exploration**, automated **data mapping and transformations**, accelerating project deliveries ~60%.
 - ◆ End-to-end technical solution design of Salesforce Effectiveness fully integrated reporting, self-service and ad-hoc analysis for **60 countries**, multiple sales lines and more than 2000 data consumers, creating a **unique Commercial data hub** and a **trusted data foundation** for the customer. Leading technical architect of up to **15 developers** and successfully **mentored junior architects**.
AWS **Snowflake medallion architecture**, Power BI from data domains like **CRM** (Veeva) Calls, Events, CLM, ToT, Customer Universe, Samples; **Google Analytics**, **Piwik**; **SFMC** campaigns; ex-factory sales (**SAP**); **sub-national market sales** (IQVIA & 3rd party).
 - ◆ Designed and delivered accelerators **Snowflake and Databricks frameworks** with a curated **standardized Commercial data model**, including **ARD generation** and standard Commercial Pharma business rules, **reused in more than 15** other customer projects since.

- 2013 - 2019
- 

IQVIA – Analyst, Consultant – Basel, Switzerland
 - Developed Salesforce Effectiveness dashboards for multiple clients, harmonizing Veeva CRM and market sales data across countries to deliver a unified view of commercial performance in **Power BI** and **Tableau**. Building data ingestion and transformation pipelines **optimizing data management processes** amongst teams. Designed and implemented a **standardized, reusable medallion data model**, along with ETL and master data management processes for a sales data harmonization platform, using Microsoft SSIS and Microsoft MDS.

- 2010-13
- 

SopraSteria – Analyst – Strasbourg, France
 - Delivery of multiple projects for Banks, Schools, Avionics & general industries in various stacks like Java EE, .NET, Qt/C++, Windows CE.

CERTIFICATIONS & EDUCATION

Snowflake SnowPro Core	q3 2026
Databricks Data Engineer Associate	OCT 2025
Masters in Computer Science for Business management	OBTAINED WITH HONORS
MIAGE – Université de Haute Alsace, Mulhouse - France	IN 2010

LEISURE & OTHERS
