PROFILE & ACHIEVEMENTS

Senior Data & AI Platform Architect and Technical Lead with **16 years of experience** designing and delivering enterprise data platforms for multiple Life Sciences clients. Combines hands-on data engineering, technical architecture and delivery leadership across **Snowflake**, **Databricks** and **Azure**, translating business needs into practical, maintainable data products and reusable delivery patterns. Brings applied experience in **GenAI-enabled data products** and delivery accelerators. Built **trusted, scalable data foundations**, reusable ETL/ELT accelerators and production-grade data quality controls supporting **350+ commercial data sources** across **60+ countries** and **2,000+ users**.

- **Built Snowflake and Databricks medallion accelerators reused across 15+ projects** reducing data-source onboarding and transformation time from up to **10 days to 2 days per source**.
- **Developed and improved production ELT/ETL pipelines** with reusable data quality frameworks, enhancing data trust; optimized Snowflake SQL and compute, reducing monthly costs **by 40%**.
- **Provided hands-on technical leadership** across **20+ projects**, defining architecture and engineering standards while mentoring teams of **up to 15 developers** and supporting the growth of junior architects.

DATA, AI, PLATFORM SKILLS & LEADERSHIP

DATA PLATFORM & ARCHITECTURE	Snowflake, Databricks, SQL Server, Azure cloud-native architectures, Medallion architecture, Azure networking (ACA, vnets, Gateway).
GENAI & INTELLIGENT SEARCH	Azure AI Foundry, Azure OpenAI, Cognitive Search, RAG workflows, Snowflake Cortex, Databricks Genie, Claude Code.
DATA ENGINEERING & INTEGRATION	Ingestion & transformation pipelines (batch, stream), ELT/ETL (dbt, PySpark, SSIS, Informatica), Lakehouse.
DATA GOVERNANCE & MANAGEMENT	Data quality, data validation, dimensional data modelling, master data management, harmonization, metadata, lineage, integrity checks, data profiling.
DEVELOPMENT & AUTOMATION	Python, SQL with best practices & standard patterns (CDC, SCD), Bash, Linux, Automation scripting, Reusable frameworks & accelerators.
DEVOPS & DEPLOYMENT AUTOMATION	GitLab CI/CD, Infrastructure as Code (IaC), Databricks Asset Bundles (DAB), Deployment automation, Environment provisioning, Docker containerization.
BI & ANALYTICS	Power BI, Tableau, Semantic layer design & ARD, SSAS, self-service analytics.
COLLABORATION & LEADERSHIP	Business requirements translation, client-facing consulting, stakeholder management, technical leadership, mentoring, cross-functional collaboration, delivery ownership, standardization, proposal/offering development.

EDUCATION & CERTIFICATIONS

Snowflake SnowPro Core	PREPARATION – Q3 2026
dbt Fundamentals	OBTAINED – AUGUST 2026
Databricks Data Engineer Associate	OBTAINED – OCTOBER 2025
Master's degree in Computer Science for Business management MIAGE – Université de Haute Alsace, Mulhouse - France	OBTAINED WITH HONORS - JUNE 2010

LANGUAGES

French, native speaker (C2) | **English**, fluent (C1) | **German**, beginner (A2)

PROFESSIONAL EXPERIENCE

IQVIA – Basel, Switzerland

June 2013 – July 2026

Core member of the EMEA Commercial Tech team at IQVIA, a worldwide leader in healthcare analytics. Supported the delivery of technical solutions for 10+ pharma & biotech clients across Pharma Commercial business, analytics solutions, and AI-ready data platforms, unifying fragmented data into actionable insights.

Engagement Manager | Solution Architect, Technical Lead

October 2022 – July 2026

Led multiple projects through hands-on implementation and mentored technical teams, translating business requirements with stakeholders into data platforms on AWS Snowflake and Azure Databricks, and Azure cloud-native AI solutions using Azure OpenAI and Azure AI Foundry.

- **Led the technical architecture of a complex Snowflake multi-tenant to single-tenant migration** across EU, APAC and LATAM, defining consolidation, surrogate-key, data-regression testing and parallel-environment DevOps approaches; achieved **over 98% daily source-to-target data matching**.
- **Designed and implemented an Azure cloud-native GenAI medical chatbot** offering for **200+ healthcare professionals** across three countries.
- **Implemented modular data ingestion, quality and integrity frameworks in Snowflake and Databricks**, strengthening trust in production data, simplifying onboarding and **reducing quality concerns by 20%**.
- **Established an internal LLM-assisted delivery framework and engineering standards**, delivering over **10 accelerators** and enabling teams to reduce application delivery time **from two weeks to two hours**.

Senior Consultant | Technical Lead, Senior Data Engineer

October 2019 – October 2022

Built end-to-end integrated Data Platforms on AWS Snowflake for business reporting, ad-hoc analysis and self-service data products, ingesting and standardizing 350+ commercial data sources in enterprise-grade data hubs.

- **Designed and implemented a commercial data hub and trusted data foundation** for **60 countries**, multiple sales lines, and **2,000+ data consumers**, expanding platform adoption by **40%** and increasing data processing frequency from **weekly to daily**.
- **Implemented a standardized commercial data model and business rules engine** (e.g., markets and alignments) across **10 projects**, reducing development time for subsequent projects by **70%**.
- **Led a team of up to 15 developers** and mentored technical architects whose growth **led to promotions**.

Consultant | Data Engineer, Technical Lead

October 2016 – October 2019

Delivered Salesforce Effectiveness reporting, dashboarding, and data integration platforms for **seven GxP-regulated clients**, harmonizing CRM and market sales data across up to **15 countries** into unified Power BI and Tableau commercial-performance views, reducing data integration time by **30%**.

Analyst | Data Engineer, Software Engineer

June 2013 – October 2016

Developed SQL Server data-ingestion and transformation pipelines and **reusable data-management patterns** across teams and projects. Designed a standardized medallion data model using Informatica, SSIS, master data management and SSAS cubes; built an ASP.NET orchestration tool that reduced data-ingestion implementation time by **approximately 20%** and was **reused across projects**.

SopraSteria – Strasbourg, France

June 2010 – June 2013

Analyst | Software Engineer

Delivered multiple software engineering projects for banking, education and aviation across Java EE, C#/.NET, ASP.NET, Qt/C++, and Windows CE.

LEISURE & OTHERS

Self-hosting (60+ Docker containers) | Home automation (energy-saving focus) | Lego building | Choir founder | 3D Printing
